EXPERIENCE

AI/LLM Engineer II

Phenom People

April 2025 – Present

Hyderabad, Telangana

- Architected **chatbotCXA**gent, a production multi-agent orchestration system on **LangGraph** (12 orchestrated nodes) spanning intent recognition, planning, dialogue-state management and tool routing — with **Graph RAG** pipelines over enterprise knowledge and document repositories via FAISS vector search and a Neo4j graph for multi-hop, policy-aware grounding.
- Engineered tool-calling agents that execute governed actions — database queries and structured extraction from unstructured documents — under **XGrammar constrained decoding** and schema-validated JSON guardrails, raising tool-routing accuracy to **91.9%** and eliminating malformed tool calls in live traffic.
- Built an **LLM evaluation framework** (pass@k, LLM-as-judge rubric) gating every release across all 12 nodes, instrumented with **LiteLLM + Langfuse** for per-node cost, latency and full-trace observability — monitoring agent behaviour in production and curbing hallucinations.
- Building the detection and decisioning layer of an enterprise HR tech **hiring-integrity / fraud-risk platform** — an **LLM orchestration engine** that investigates flagged candidate activity, correlates evidence across signals and produces reviewer-facing HR decision support with supporting rationale — backed by a **policy-driven rules engine**, per-tenant risk configuration and audited review workflows.
- Built a greenfield **FastAPI** configuration service on **MongoDB** with tenant-scoped overrides, exposed through an internal resolve REST API that **Temporal** workflows call at workflow start to decide which checks apply to a candidate and job.
- Worked extensively with **MCP (Model Context Protocol) servers** — ClickHouse, Playwright and Atlassian — as the tool layer in day-to-day agent development, debugging and issue tracking.
- Delivered **WhatsApp** as a conversational channel through the **WhatsApp** Business API — message templates, the 24-hour customer-service window and a from-address lookup API — so the assistant could reach candidates outside the web widget.
- Owned tenant provisioning and deployment for enterprise customers — provision and unprovision APIs with region-scoped tenant listing, containerised deployment via **Docker** and **Helm** across staging environments, and production support resolving customer tickets from service logs in **ClickHouse**.

Full Stack Engineer

Blueleaves Farms

May 2022 – February 2025

Hyderabad, Telangana

- Ran customer discovery directly with **shareholders, company VPs** and external partner businesses (including farming companies), translating their operational asks into technical designs and delivering each implementation end to end.
- Owned end-to-end delivery of production systems (POS, CRM, inventory, procurement, e-commerce) on Node.js, event-driven Firebase Cloud Functions and REST APIs — with role-based access control and CI/CD — integrating multiple internal systems and cutting manual operational errors by roughly 90%.

PROJECTS

IndexNotes — AI Knowledge Graph for Scientific Papers | *Neo4j, Ollama, PyMuPDF, Python, Docker*

- Built an automated Graph RAG pipeline ingesting research papers (PDF → local-LLM extraction → structured JSON → Neo4j), creating 40+ concepts and 17+ typed relationships, with quantized local models via Ollama for entity/relationship extraction on a schema enabling multi-hop traversal and cross-document retrieval.

TECHNICAL SKILLS

GenAI & Agentic: Agentic / Multi-Agent Systems, LangGraph, LangChain, MCP Servers, Tool/Function Calling, Prompt Engineering, RAG & Graph RAG, LLM Fine-Tuning (QLoRA, SFT), Model Routing

Evaluation & Observability: LLM Evaluation (LLM-as-judge, pass@k), Langfuse, LiteLLM, OpenTelemetry, Model Monitoring, Constrained Decoding (XGrammar), Schema Validation, Hallucination Mitigation

Integrations, Backend & Auth: Python, TypeScript, FastAPI, Node.js, REST APIs, Microservices, Temporal, Kafka, OAuth / SSO, Keycloak, Role-Based Access Control, AWS (EC2/S3/SageMaker), Docker, Helm, GitHub Actions, CI/CD

ML & Serving: PyTorch, vLLM, Transformers (BERT/ModernBERT), HuggingFace PEFT, Unsloth, Ollama, Production MLOps

Databases: PostgreSQL, MongoDB, Neo4j, ClickHouse, Redis, Firebase

EDUCATION

Andhra Loyola Institute of Engineering and Technology

Bachelor of Technology in Mechanical Engineering

Vijayawada, Andhra Pradesh

August 2018 – May 2022
