Experience

AI/LLM Engineer II

April 2025 – Present

Phenom People

Hyderabad, Telangana

- Architected chatbotCXAgent, a production multi-agent system on LangGraph (12 orchestrated nodes) spanning intent recognition, planning, dialogue-state management, and tool routing — with Graph RAG retrieval over enterprise knowledge and document repositories via FAISS vector search and a Neo4j graph for multi-hop, policy-aware grounding.
- Engineered tool-calling agents that execute governed actions — database queries and structured extraction from unstructured documents — under XGrammar constrained decoding and schema-validated JSON guardrails, raising tool-routing accuracy to 91.9% and eliminating malformed tool calls in live traffic.
- Designed the configuration and policy plane for an enterprise hiring-integrity / fraud-risk platform: a global fraud-signal registry with feature groups, tenant-scoped overrides, and applicable-context gating, exposed through a resolve API consumed by the reviewer console and the live detection pipeline — including a role-gated signal-lifecycle state machine, versioned definitions that keep downstream consumers stable across config changes, and CEL-evaluated decision policies (score / condition → action).
- Built an LLM evaluation framework (pass@k, LLM-as-judge rubric) gating every release across all 12 nodes, instrumented with LiteLLM + Langfuse for per-node cost, latency, and full-trace auditability — continuously monitoring agent behaviour and curbing hallucinations.
- Fine-tuned and served Qwen models via QLoRA (Unsloth, NF4) on vLLM / AWS g5.xlarge (A10G), sustaining 10.98 RPS at 98.6% success under load at roughly half the inference cost of hosted GPT-4.1.
- Fine-tuned a multi-task ModernBERT (intent + NER) in PyTorch, raising NLU accuracy from 87% to 97%.

Full Stack Engineer

May 2022 – February 2025

Blueleaves Farms

Hyderabad, Telangana

- Built data-driven analytics on large-scale transactional and stock-movement data — demand forecasting, sales-trend, and inventory models that surfaced discrepancies and improved procurement/replenishment decisions across 5+ locations and 10,000+ monthly transactions.
- Owned end-to-end delivery of production systems (POS, CRM, inventory, procurement, e-commerce) on Node.js, Firebase Cloud Functions, and REST APIs — with role-based access control and CI/CD — integrating multiple internal systems and cutting manual operational errors by roughly 90%.

Projects

NorthStar — Motorcycle Navigation Companion App | *Android, BLE, Maps SDK*

- Built and shipped a companion app for the Royal Enfield Tripper Dash, delivering turn-by-turn navigation to the bike's connected instrument cluster and growing an organic user base without paid distribution.
- Traction drew Royal Enfield's attention directly, leading to an on-site collaboration visit at their HQ to discuss the work.

IndexNotes — AI Knowledge Graph for Scientific Papers | *Neo4j, Ollama, PyMuPDF, Python, Docker*

- Built an automated Graph RAG pipeline ingesting research papers (PDF → local-LLM extraction → structured JSON → Neo4j), creating 40+ concepts and 17+ typed relationships, with quantized local models via Ollama for entity/relationship extraction.
- Designed a Neo4j schema enabling multi-hop graph traversal and cross-document retrieval across scientific domains.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, Bash

GenAI & Agentic: Agentic / Multi-Agent Systems, LangGraph, LangChain, Tool/Function Calling, Prompt Engineering, Model Routing, Context-Window Management, RAG & Graph RAG, LLM Fine-Tuning (QLoRA, SFT)

Eval, Observability & Guardrails: LLM Evaluation (LLM-as-judge, pass@k), Constrained Decoding (XGrammar), Schema Validation, Langfuse, LiteLLM, Model Monitoring, Hallucination Mitigation, Role-Based Access Control

ML & Serving: PyTorch, Transformers (BERT/ModernBERT), HuggingFace PEFT, Unsloth, vLLM, Embeddings / Vector Search (FAISS), Neo4j, Ollama, Production MLOps

Backend & Infra: FastAPI, Node.js, Express.js, REST APIs, Microservices, Docker, AWS (EC2/S3/SageMaker), GitHub Actions, CI/CD, Linux

Databases: PostgreSQL, Neo4j, MongoDB, Redis, Firebase

Education

Andhra Loyola Institute of Engineering and Technology

Vijayawada, Andhra Pradesh

Bachelor of Technology in Mechanical Engineering

August 2018 – May 2022
